

A Simple Solution for Fuel Pump Control

What is the focus of today's station operator? It's to offer efficient, quality fuel service to the public at a profitable price. Is this a complicated process? No! It doesn't have to be.

Triangle MicroSystems has put 35 years of fuel control experience into a system that is widely recognized for its consistent quality, high reliability, low maintenance, and service support.

Dispenser Interfaces supported:

- Gilbarco
- Tokheim
- Wayne
- Bennett

Call us today for details on how you can make the EZ Solution work for your installation:
