## 800 SERIES ORVR NOZZLE

The HEALY™ brand has a long and established reputation for highly efficient, durable, reliable, and long-lasting vapor recovery nozzles. Our HEALY™ brand 800 Series ORVR (onboard refueling vapor recovery) fills cars faster with high flow rates while the vacuum-assisted design keeps customers and forecourts clean with its dripless and spitless technology. The smart interface design will automatically detect whether a vehicle is equipped with ORVR to prevent overpressurization caused by clean air being pulled back into the storage tank.

### HIGHLIGHTS

- Features the easy-to-use, durable design which captures the vapors through a reduced sized boot.
- Features internal ORVR sensor and internal proportioning valve within the nozzle itself.
- Reduced maintenance cost with training making it easy to perform inspections and repairs.
- Added peace of mind that this nozzle will remain compliant with new Mexico regulations.
- Over horizontal shut-off and no-pressure, no-flow technologies for safety.
