## About the Doublewall Tall Collar Tank Sumps with Lids

The octagon-shaped collar-mount doublewall tank sump is ideally configured for piping laid out in 45- and 90-degree angles. It is field height-adjustable and features a pour channel that makes for a simple PC slurry pour to join the sump base and top hat. It comes standard with a snap-lock lid with vertical O-ring seal to make it watertight with other available lid options. It is VPH compliant and can be laminated on to doublewall collars. When using Bravo doublewall collars with a pour channel, no field lamination is needed. It ships under 20" HG vacuum to ensure wall integrity.

### SIZES

- 42" or 48" diameter
- 32" or 36" reducer

*\*See page 2 for dimension drawing and dimension chart*

### MATERIAL

- Fiberglass

### SPECIFICATIONS

- Quality FRP construction
- Split configuration is height-adjustable
- Fuel compatible resin doesn't require gel coat
- Doublewall is suitable for constant monitoring – triennial testing exempt
- 30-year corrosion warranty
- UL2447 listed

### 42" Diameter Tall Collar Doublewall VPH FRP, Two-piece height adjustable octagon sump

Sump Type	Part # with 32" SL Lid	Part # with 36" SL Lid	Part # with 32" Twist-Lock Lid	Min/Max	A	B	C	D
