

NEW CONSTRUCTION FITTINGS

SIZES

- 3" x 2"
- 2" LCX

MATERIAL

- Tank-spec fiberglass

Pipe Type	Part #	Description
3" x 2" and 2" LCX	F-32U-T-F	3x2" and 2" LCX, universal full-body termination for size-over-size and LCX pipe, dual test ports, epoxy req'd

UF Universal Full-Body Series

The Bravo universal full-body entry fitting is compatible with both singlewall and doublewall monitored sumps. It is a termination entry fitting which terminates secondary pipe at the exterior of the containment sump. A separate test reducer is not needed to terminate from primary to secondary pipe. This fitting has dual integrated test ports that can be used for testing, drainage to a sensor, or VPH constant monitoring. This fitting is universal between size-over-size and coaxial FRP. It can be used for series piping with LCX. Quality FRP construction and bonded installation provide an extremely long service life compared to flexible entry fittings.

SPECIFICATIONS

- Universal fitting for size-over-size or LCX
- Bonded FRP entry fitting, for long service life
- Available for singlewall and doublewall sumps
- No piping test reducers required
- Dual redundant test ports
- For flat sumps only
- 30-year corrosion warranty
- UL2447 Listed
